PROFESSIONAL SUMMARY

Computer Science and Engineering student with **ServiceNow Certified System Administrator (CSA)** and **Certified Application Developer (CAD)** credentials, supported by a strong foundation in Java, OOP, data structures, algorithms and web technologies. Familiar with ServiceNow platform administration and application-development concepts including ITSM, tables and data model, ACL/security, Flow Designer, Business Rules, Client Scripts, UI Policies, Service Catalog, Knowledge Base, reporting and REST-based integrations. Seeking an entry-level ServiceNow opportunity where I can contribute to configuration, development, automation, debugging and continuous learning.

SERVICENOW SKILLS

Platform	ServiceNow CSA, CAD, UI16, Application Navigator, tables, forms, lists, related lists, reference fields, data model
Development	Business Rules, Client Scripts, UI Policies, UI Actions, ACLs, Script Includes, Flow Designer / Workflow concepts, application development
ITSM & Apps	Incident, Problem, Change, Service Catalog, Knowledge Base, SLAs/OLAs, User Criteria, reporting and dashboards
Integration	REST APIs, API integration concepts, data exchange, authentication concepts

EDUCATION

B.E. Computer Science and Engineering	Bannari Amman Institute of Technology | 2023–2027
HSC	Sri Sarada Vidyalaya Matric Higher Secondary School | 2023
SSLC	Sri Sarada Vidyalaya Matric Higher Secondary School | 2021

TECHNICAL SKILLS

Languages: Java, C++, Python (Basics)

Web: HTML, CSS, JavaScript

CS: OOP, DSA, Arrays, Strings, Hashing, Recursion, Problem Solving

Other: API Integration, Git/GitHub

PROJECTS

Smart Documentation Management System

- Designed a system for digitizing, tracking and securely managing documents through defined workflow stages: Draft, Review and Approved.
- Implemented workflow automation and status tracking to improve transparency and reduce processing delays.
- Applied secure authentication and role-based access control to protect sensitive documents.

Secure Chat Application using Java and AES Encryption

- Developed a secure chat application using Java and socket programming with AES-based message encryption.
- Implemented authentication and protected communication mechanisms with a focus on data privacy.

Farmer–Buyer Connection Platform

- Designed a platform to connect farmers and buyers directly and explored in-app/WhatsApp messaging approaches.
- Integrated AI functionality using the Gemini API.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA) — 2026
- ServiceNow Certified Application Developer (CAD) — 2026
- Introduction to Data Science — Cisco Networking Academy, Feb 2026

ACHIEVEMENTS

- Solved 100+ coding problems on LeetCode.
- Participated in Smart India Hackathon 2024.
- Developed 3+ software projects using Java, web technologies and API integration.
